

## ZO MOTORS Expands Nationwide After-Sales Service Network, Joins Japan Autobody Repair Work Association

Leading Zero Emission Commercial Vehicle Manufacturer, ZO MOTORS, Strengthens Service Capabilities with JARWA Membership in Japan

**Tokyo, Japan – November 2024** – ZO MOTORS Corp. (hereinafter "ZO MOTORS"), headquartered in Chuo-ku, Tokyo, under leadership of CEO & President Shinsaku Hanada, has officially joined the Japan Autobody Repair Work Association (JARWA). JARWA, based in Chiyoda-ku, Tokyo, and led by Representative Director Hajime Yoshino, is a prominent industry association dedicated to upholding high standards for vehicle safety and environmental performance. This partnership allows ZO MOTORS to significantly expand its after-sales maintenance network across nearly all of Japan's prefectures, thereby enhancing customer support nationwide.\*

\*Note: 46 prefectures excluding Okinawa

With the logistics industry advancing toward carbon neutrality, ZO MOTORS has led efforts to promote zero emission commercial vehicles across Japan. However, establishing a high-quality, nationwide maintenance network has presented a significant challenge. At the same time, JARWA has been seeking partnerships with zero emission vehicle manufacturers to equip its member companies with the specialized maintenance knowledge and safety protocols needed for electric and alternative energy vehicles. By joining JARWA, ZO MOTORS aims to ensure that its vehicles receive optimal, reliable maintenance comparable to that of traditional gasoline and diesel models, facilitating the

widespread adoption of environmentally friendly commercial vehicles across Japan.

As a JARWA member, ZO MOTORS will collaborate to deliver specialized maintenance training for its zero emission commercial vehicles to JARWA's extensive network of Vehicle Inspection Affiliated Maintenance Workshops. This partnership aims to enhance service quality and consistency nationwide.

#### **About the Japan Autobody Repair Work Association (JARWA)**

Founded in March 2014 by eight Japanese automakers and four melting machine manufacturers, JARWA aims to uphold high standards of reliability in autobody repair. Serving as an impartial hub, the association provides scientifically, economically, and politically neutral information to support and enhance the environmental and safety performance of vehicles.
